CREATE CHANGE

Studio 2 – Interaction Design
DECO2850 / DECO7285

Week 7: User Experience

Housekeeping

- Assessment 1 completed
- Assessment 2.1 is next week

Design Exhibit 1 (Week 8)

Week 7 – What to expect

- You will get 30 mins to prep your “exhibition booth”
- All team members must be present and actively participate
  - No show = 0 marks for this milestone
- You are responsible to bring everything that you need.
  - Make use of classroom walls and/or whiteboards
- We will bring the following
  - Butchers' papers, markers, scissors, tape
- 2 x tutors will assess your work at different times
  - Each tutor will spend 10-15 minutes at your booth
- You will have the first 5 minutes to pitch your project
  - You can simply show a demo of your project OR run a role-play OR use any other creative form to show your work

Today’s Topic

- 10:00 to 10:30 | Project Feasibility discussion
- 10:30 to 11:00 | Intro to User Experience (UX)
- 11:00 to 13:50 | Studio: Apply learnings in your own projects

Outcome:

Be able to incorporate UX in your prototypes

User Experience

User Experience

We don’t just use technology,

we live with it.

Waking-up Experience

(1)

(2)

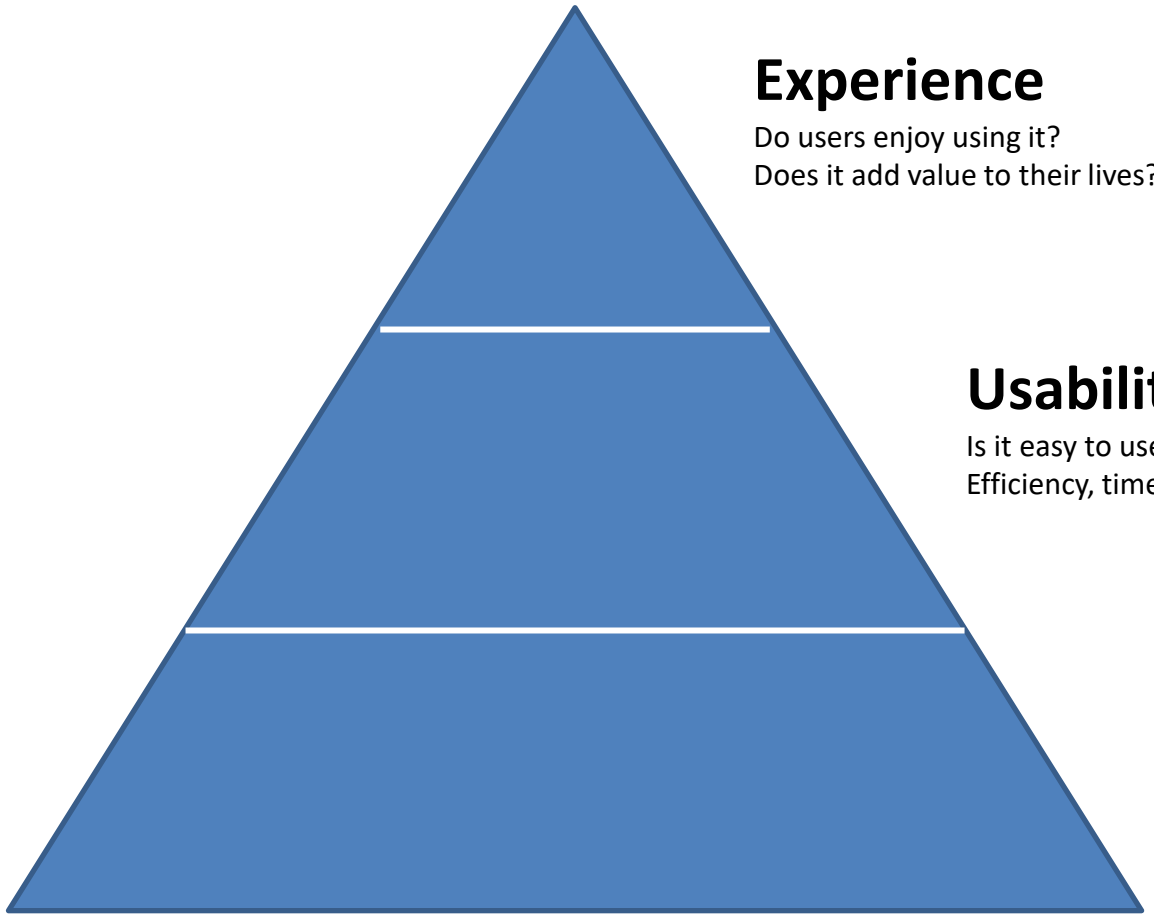

Which scenario would you prefer?

Philips' wake-up lights

What is User Experience?

User Experience

Experience

Do users enjoy using it?
Does it add value to their lives?

Usability

Is it easy to use?
Efficiency, timeliness, etc.

Functionality

Does it work?
Does it do what it is supposed to do?

Usability to User Experience

Usability Goals

- Consistency
- User-control
- Flexibility
- Error-prevention
- Help
- etc...

User Experience Goals

- Enjoyment
- Fun
- Pleasure
- Values
- Emotions
- etc…

Objective goals to Subjective goals

User Experience Goals

- satisfying
- enjoyable
- engaging
- pleasurable
- exciting
- entertaining
- helpful
- motivating
- challenging
- aesthetically pleasing
- supportive of creativity
- supportive of creativity
- rewarding
- fun
- provocative
- surprising
- enhancing sociability
- emotionally fulfilling

User Experience Design

- Experience *before* Product
- Beyond utility and look-and-feel
- Holistic approach
- Utilize human skills and senses
- Context plays an important role

Approaches: User Experience

Approaches

“Four Pleasures” – A framework to support pleasurable experiences in products & systems. Patrick Jordan. (2000)

Four Pleasures

Patrick Jordan (2002)

Pleasure: “the condition of consciousness or sensation induced by the enjoyment or anticipation of what is felt or viewed as good or desirable; enjoyment, delight, gratification. The opposite of pain.”

The Four Pleasures:

A Framework for considering Pleasure with Products

- Physio-pleasure
- Socio-Pleasure
- Ideo-Pleasure
- Psycho-Pleasure

Jordan, P. W. (2002). *Designing pleasurable products: An introduction to the new human factors*. CRC press.

Four Pleasures

Physio-pleasure

- Pleasure concerned with the body and senses
- Look and feel
- Touch, test, smell, etc.
- Tactile Pleasure – Telephone handset, Remote control
- Olfactory Pleasure – Smell inside a new car

Four Pleasures

Socio-Pleasure

- Pleasure driven from the relationships with others, e.g. friends, family, loved ones, colleagues, or the society as a whole.
  - Products that facilitates social interaction: Mobile phones, SMS, Tweets, etc.
  - Products that represents your image in social contexts

Four Pleasures

Psycho-Pleasure (Psychological Pleasure)

- Refers to people's cognitive reactions.
- The productive goals related to the system
- "getting a job done", "feeling satisfied"
- Functional, utilitarian and usability oriented
- E.g. being able to use the word processor easily and producing the required documents could lead to psycho-pleasure.

Four Pleasures

Ideo-Pleasure (Ideological Pleasure)

- Refers to people's taste, values & aspirations
- Taste: for specific colour, shape, style or pattern
- Value: philosophical or religious; ethics; love for environment, (e.g. hybrid cars)
- Aspirations: what people hope to become or want to see themselves as; e.g. good career, wealthy.

Taste for Harley Davidson Motor Bikes

Electric Car

An Exercise

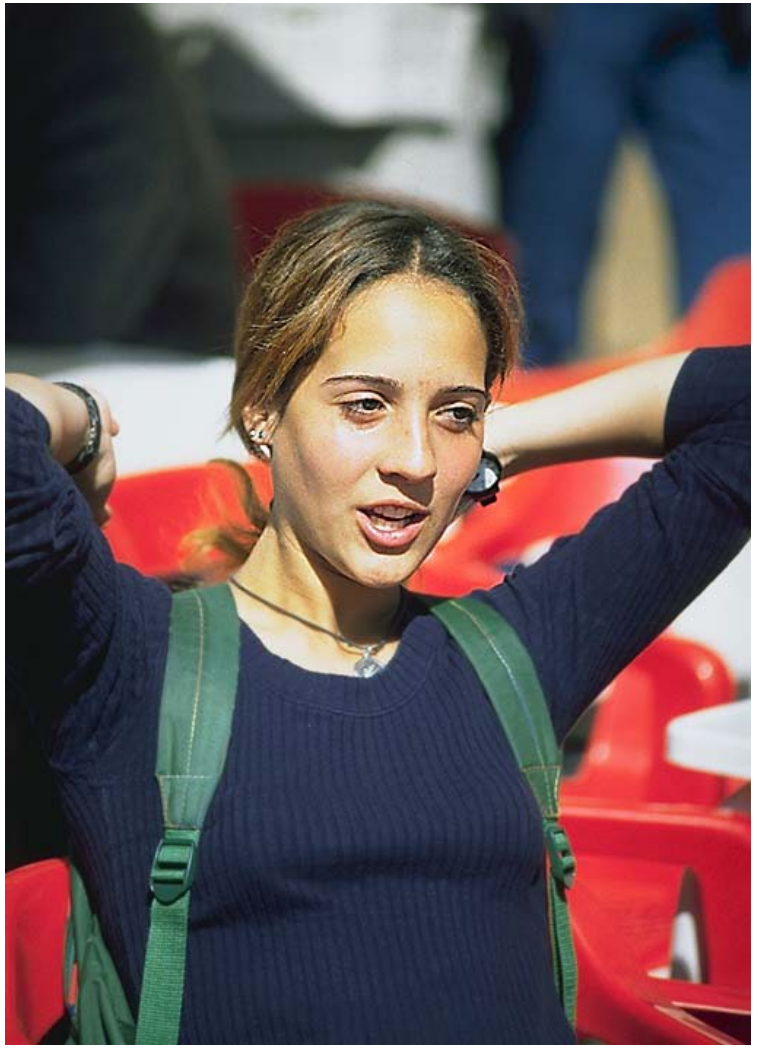

Exercise: Design

- **Product** — Portable Music Player
- **Target Group** — Teenage Girls

Using Pat Jordan’s Four Pleasures framework

Persona: Gabriella Mendez

- 16-year-old student
- lives in Barcelona
- studies music in high-school
- very ambitious and wants make a career in the music industry
- loves R&B, Hip-hop and Reggae music and has music CDs of almost all R&B stars.
- stays at the school hostel but keeps regular contact with her parents
- whenever in her room, she always listens to music on her computer. Her room is full of posters of movie/pop stars.
- keen sports player – an active member of the school's basketball team
- cares for her fitness, sometimes goes out for drinks with team-mates
- dates Carlos, a 17-year-old student in the same school
- Goes out to the musical shows
- friends slightly envious of her lifestyle

Physio-Product Characters

Physio-pleasure

- Pleasure concerned with the body and senses
- Touch, test, smell, etc.
- Tactile Pleasure – Telephone handset, Remote control
- Olfactory Pleasure – Smell inside a new car

- Texture: Feels good in the hand
- Easy to carry around
- Fits well and comfortably inside her pocket
- Operate without causing damage to fingernails
- Should have aesthetic look & feel

Socio-Product Characters

Socio-Pleasure

- Pleasure driven from the relationships with others, e.g. friends, family, loved ones, colleagues, or the society as a whole.
  - Products that facilitates social interaction: Mobile phones, SMS, Tweets, etc.
  - Products that represents your image in social contexts

- Sharing playlists to friends via WiFi or Bluetooth.
- Being able to know what music her friends are listening to
- Recommendation songs based on her friends' playlists
- Should be competitive amongst her friend circle

Psycho-Product Characters

Psycho-Pleasure

- Refers to people's cognitive reactions.
- The productive goals related with the system
- "getting a job done", "feeling satisfied"
- E.g. being able to use the word processor easily and produce the required documents could lead to psycho-pleasure.

- Supports quick and intuitive operations
- Enhanced music quality
- Personalization of music
- Fitness-related features
- Durable Batteries

Ideo-Product Characters

Ideo-Pleasure

- Refers to people's taste, values & aspirations
- Taste: for specific colour, shape, style or pattern
- Value: philosophical or religious, ethics, love for environment, (e.g. hybrid cars)
- Aspirations: what people hope to become or want to see themselves as; e.g. good career, wealthy.

- Gets news items related to the music industry
- Environmentally friendly (not too noisy for others)

Gabriella's Portable Music Player

Physio-Product Characters

- Texture: Feels good in the hand
- Easy to carry around
- Fits well and comfortably inside her pocket
- Operate without causing damage to fingernails
- Should have aesthetic look & feel

Socio-Product Characters

- Sharing playlists to friends via WiFi or Bluetooth.
- Being able to know what music her friends are listening to
- Should convey her socio-economic & cultural status
- Should be competitive amongst her friend circle

Psycho-Product Characters

- Supports quick and intuitive operations
- Enhanced music quality
- Personalization of music
- Fitness-related features
- Durable Batteries

Ideo-Product Characters

- Gets news items related to the music industry
- Environmentally friendly (not too noisy for others)

Any Questions?

UX Activity

Re-visit your prototypes using

- Pleasure Framework

Steps:

1. Brainstorm “what experiences you want your participants to have” - 20-30 mins
2. Create/Update a user persona (use data from your field studies) - 20-30 mins
3. Apply one of the Four Pleasure frameworks – 30 min to 1 hr
4. Update your prototypes

1. Think about “Experience” first

- In your teams, brainstorm, what experiences your end-user should have from your product
  - Develop family cohesion, belongingness in children
  - Reduce stress at workplaces

- Don’t think about prototype features or functionalities, at this stage

2. Update/Create a Persona

- Update your persona based on new insights

Erica

•Lives in Queens, works in finance in Manhattan
•Age 32

Relevant Characteristics & Behaviors:

•Is a senior vice president at work and must look professional and respected
•Will not wear a helmet
•Prioritizes her daughter and success at work over everything else

Key Goals for a Journey:

•Wants to get to work safely and efficiently and arrive looking nice
•Likes spending time with her daughter whenever possible

Frustrations with Existing Mobility:

•Stress of driving in traffic and possibility of train delays gets exhausting
•Unreliable bus routes make her call a cab for her daughter to get her to school rather than take the bus with her

Perception of biking as a practice:

•Unsafe, stressful, difficult
•Only for athletic people or daredevils
•She would be viewed as irresponsible if she let her daughter ride a bike, because it's dangerous and she might get hurt

What makes her happy?

•Spending time with her daughter
•Relaxing, not having to worry
•Being able to make a plan and not be interrupted by something unexpected

Ideal Scenario Example:

It's 7:30am and Erica just realized she slept through her alarm. She throws on her work clothes, puts on makeup and is feeling professional and ready to impress at work. But, since she can't do makeup and make her daughter breakfast at the same time she has to yell to her to grab some fruit and a cereal bar and then she and her daughter run down the stairs and out the door. They are both nervous about arriving on time, but the journey is safe, quick and easy as they don't have to battle any cars or race the traffic lights. Her daughter is able to eat her food sitting in the back seat and also calls out a cute squirrel she sees on a tree. This makes Erica happy because she loves to see her daughter smile. They end up getting to school on time, and while she knows it embarasses her daughter, Erica gives her a hug and kiss goodbye before peddling over to work.

3. Apply the Pleasures Framework

Physio-pleasure

- Pleasure concerned with the body and senses
- Touch, test, smell, etc.
- Tactile Pleasure – Telephone handset, Remote control
- Olfactory Pleasure – Smell inside a new car

Socio-Pleasure

- Pleasure driven from the relationships with others, e.g. friends, family, loved ones, colleagues, or the society as a whole.
- Products that facilitates social interaction: Mobile phones, SMS, Tweets, etc.
- Products that represents your image in social contexts

Psycho-Pleasure (Psychological Pleasure)

- Refers to people's cognitive reactions.
- The productive goals related to the system
- "getting a job done", "feeling satisfied"
- Functional, utilitarian and usability oriented
- E.g. being able to use the word processor easily and producing the required documents could lead to psycho-pleasure.

Ideo-Pleasure

- Refers to people's taste, values & aspirations
- Taste: for specific colour, shape, style or pattern
- Value: philosophical or religious, ethics, love for environment, (e.g. hybrid cars)
- Aspirations: what people hope to become or want to see themselves as; e.g. good career, wealthy.

4. Re-design Your Prototypes

- Prototype development

- Show us the new features
