FriendZone Evaluation Responses

SUS and Interview Findings

This report organises 4 anonymous FriendZone evaluation responses into a readable format. It combines SUS scores, task feedback and interview comments while preserving each participant's original wording. Scores range from 20 to 90, which shows that participants had substantially different usability experiences.

Response Overview

Participant	Language	Device	Prior use	SUS score
Participant 1	zh	desktop	no	80.00
Participant 2	en	desktop	no	90.00
Participant 3	en	desktop	no	62.50
Participant 4	zh	desktop	no	20.00

SUS summary Average 63.1 Median 71.2 Range 20 to 90

Patterns Across Responses

- Usability was inconsistent. Two participants scored the interface at 80 or above, while one participant scored it at 20 and reported that several functions were unclear.
- The conversation prompt was explicitly identified as helpful by two participants because it could help quieter users start a discussion.
- The leaderboard received mixed reactions. Participants mentioned comparison, pressure and the possibility of inferring another person's activity from the shared record.
- NFC and activity tracking raised privacy and clarity concerns. One participant considered the approach less invasive than real-time location tracking, while others worried about unwanted information sharing or feeling watched.

SUS Results

Overall score 80.00

Item ratings 1 to 10 3, 2, 4, 1, 3, 2, 5, 1, 4, 1

Task Feedback

Task 1 Group Selection

Completion status independent

Selected group and reason

Library Buddies；因为这个小组比较符合我的所选的需求

Reported difficulty

没有

Task 2 Conversation Prompt

Completion status independent

Prompt experience

“Coffee or tea while studying?” 感觉作为开场白有点刻意装的很自然的感觉，选这个小组的人一般比较内敛安静，不太会这样说话

Reported difficulty

没有

Task 3 NFC Timer and Leaderboard

Completion status independent

Interpretation of the feature

手机接触记录了和某个人聚会，计时器记录了和人聚会的具体时间；排行榜记录了过去七天分别和多少组员聚会了多少小时

Reported difficulty

没有

Interview Responses

Which feature was most helpful

最有帮助的算是这个辅助说话 prompt 功能吧，因为这个功能可以帮助一些内敛的同学快速融入

How did the leaderboard make you feel

我感觉有点没有必要，很奇怪，并不认为会激励我，反而有种有人会用这个去攀比的错觉

What did you think about NFC and privacy

可能会有不必要的麻烦？因为如果双方都是苹果手机，那么每次接触都会弹出对方的信息

Would the continuity or streak feature motivate continued use

如果是我主动的就不会觉得被催促，我觉得能够促使我再次联系组员一定是我在和他们相处的过程中发现我们大家是很合得来的人；如果大家和不来，那么没有必要再进行接触，可以试图寻找新的组员，认识新的朋友。

What would you change or prioritise

排行榜，我觉得排行榜并不能激励我去多和人接触

SUS Results

Overall score 90.00

Item ratings 1 to 10 5, 2, 5, 1, 5, 2, 4, 2, 5, 1

Task Feedback

Task 1 Group Selection

Completion status independent

Selected group and reason

Video game, I'm using this app looking for teammates to play with.

Reported difficulty

Nothing particular.

Task 2 Conversation Prompt

Completion status independent

Prompt experience

I tried my own question and the predefined prompt. The predefined "Where are you from originally?" clause got a nonsensical response "Jakarta. The quiet here still unsettles me a bit.".

Reported difficulty

Nothing

Task 3 NFC Timer and Leaderboard

Completion status independent

Interpretation of the feature

Record the locations of in-person meetings and the times of in-person events, then use a leaderboard to track participants who are actively involved in circles.

Reported difficulty

Nothing

Interview Responses

Which feature was most helpful

The floating window in the group chat thet promoting the event day. It pins upcoming events, so they won't be buried under a flood of messages.

How did the leaderboard make you feel

From some perspectives, it does motivate me. But I'm more concerned about personal privacy. If both in the same group, it's easy to figure out the itinerary from the leaderboard.

What did you think about NFC and privacy

Compared to Zenly, which uses real-time location tracking, this feature can already prevent a lot of personal privacy leaks. It's difficult for outsiders to learn the details from the information on the board, but people in the same circle can see the full itinerary.

Would the continuity or streak feature motivate continued use

Yes, a streak could motivate users to participate more actively in the discussion. On the other hand, once a streak is broken, users may feel frustrated and lose the motivation to continue using the app.

What would you change or prioritise

I'll add a feature that recommends other circuses where my current friends are enrolled.

Task Feedback

Task 1 Group Selection

Completion status independent

Selected group and reason

Anime Night. Because it was at the top, I just clicked it.

Reported difficulty

nothing

Task 2 Conversation Prompt

Completion status independent

Prompt experience

"Where are you from originally?" Maybe yes, I guess this can help break the ice.

Reported difficulty

nothing

Task 3 NFC Timer and Leaderboard

Completion status independent

Interpretation of the feature

They recorded the meeting time and how many people joined.

Reported difficulty

No, everything was very clear.

Interview Responses

Which feature was most helpful

The prompt feature. Sometimes we do not know what to say, and it helps us break the ice.

How did the leaderboard make you feel

I do not feel much about it.

What did you think about NFC and privacy

I might feel a little pushed. Also, the recorded time does not show the real time we spend together. Real interaction is more important.

Would the continuity or streak feature motivate continued use

It feels more like pressure. I will contact them again only if we really talk about shared hobbies.

What would you change or prioritise

I do not want to change anything.

SUS Results

Overall score 20.00

Item ratings 1 to 10 1, 5, 1, 4, 3, 3, 1, 5, 1, 2

Task Feedback

Task 1 Group Selection

Completion status not_completed

Selected group and reason

Film&TV

Reported difficulty

No

Task 2 Conversation Prompt

Completion status independent

Prompt experience

“Cinema or couch?”

Reported difficulty

No

Task 3 NFC Timer and Leaderboard

Completion status No response

Interpretation of the feature

Sorry, I don't quite understand these things.

Reported difficulty

For me, NFC, the start/end of the timer, or the leaderboard are not very clear.

Interview Responses

Which feature was most helpful

The initial selection of types and functions.

How did the leaderboard make you feel

Both.

What did you think about NFC and privacy

I might feel like I am being watched.

Would the continuity or streak feature motivate continued use

Feeling pressured.

What would you change or prioritise

The subsequent steps have more guidance.
